Role badges

Front Page (Landing)

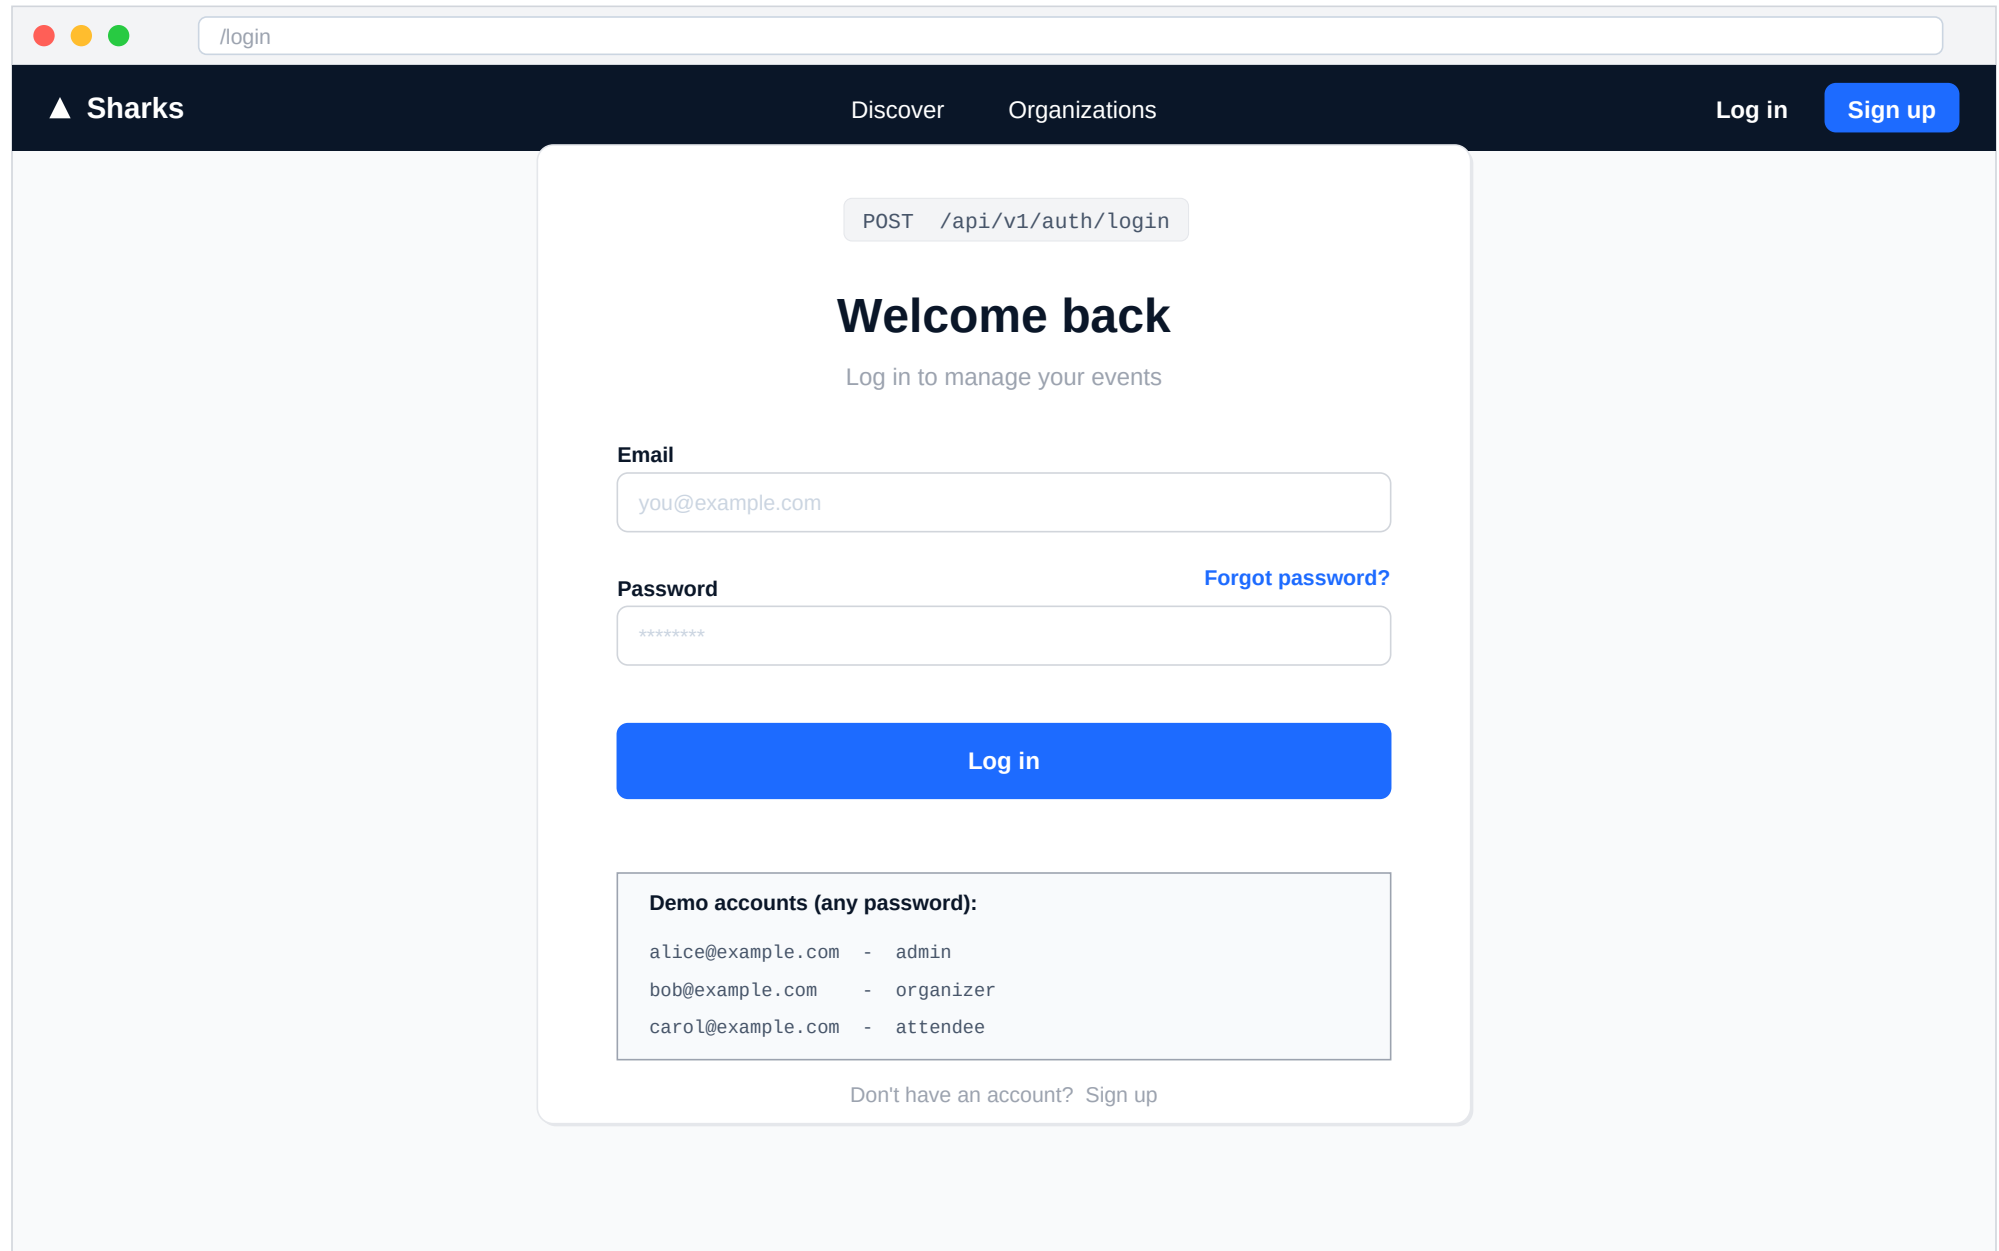

Role: Public / Guest

- Notes:**
- Marketing landing page shown to logged-out visitors at sharks-eventbrite.live
 - Hero search submits GET /api/events with the three filter params
 - Category icons link to /?category=<X>; role cards route to /signup or /login

Login

Role: Public / Guest

The wireframe shows a login page for 'Sharks EventBrite'. At the top, a dark blue header contains the 'Sharks' logo, navigation links for 'Discover' and 'Organizations', and 'Log in' and 'Sign up' buttons. Below the header, a light gray box contains the login form. The form starts with a URL bar showing '/login'. The main heading is 'Welcome back' with the subtext 'Log in to manage your events'. The form includes an 'Email' field with the placeholder 'you@example.com', a 'Password' field with masked characters, and a 'Forgot password?' link. A large blue 'Log in' button is centered below the fields. At the bottom, a 'Demo accounts (any password):' section lists three accounts: 'alice@example.com - admin', 'bob@example.com - organizer', and 'carol@example.com - attendee'. A link 'Don't have an account? Sign up' is at the very bottom.

POST /api/v1/auth/login

Welcome back

Log in to manage your events

Email

you@example.com

Password

[Forgot password?](#)

Log in

Demo accounts (any password):

- alice@example.com - admin
- bob@example.com - organizer
- carol@example.com - attendee

Don't have an account? [Sign up](#)

Notes:

- POST /api/v1/auth/login - Spring Boot auth service proxies to Supabase GoTrue
- Returns access token + refresh token; persisted to localStorage
- Demo accounts panel shown for development; gated off in production builds

Signup

Role: Public / Guest

/signup

▲ Sharks

Discover

Organizations

Log in

Password

Role

Attendee - discover and book events

V

Sign up

- Notes:**
- POST /api/v1/auth/register - provisions Supabase user via service-role admin client
 - Role written to user_metadata so it flows into JWT custom claims on first login
 - Role dropdown options: Attendee, Organizer (Admin assigned by existing admin only)

Summer Music Festival 2026

[date]

Wednesday, July 15, 2026

[time]

14:00 - 23:00

[loc]

Golden Gate Park, San Francisco, CA

[ppl]

3,420 / 5,000 attending

About this event

#outdoor

#live music

#festival

Organizer

BA

Bay Area Events Co.
Premier event organizers in the Bay Area since 2015.

Location

Google Maps embed (interactive)

Free

3,420 registered1,580 left

Register for Free

Calendar

Share

Notes:

- GET /api/events/{id} - public endpoint, no auth required
- Register button -> POST /api/v1/tickets/purchase (free events skip the payment step)
- Calendar button generates a Google Calendar template URL with prefilled event metadata

Checkout / Payment

Role: Attendee

/checkout/{eventId}

Order Summary

event image

Tech Startup Pitch Night

San Jose, CA

Business

Quantity

-

1

+

Subtotal

\$15.00

Service fee

\$0.75

Total

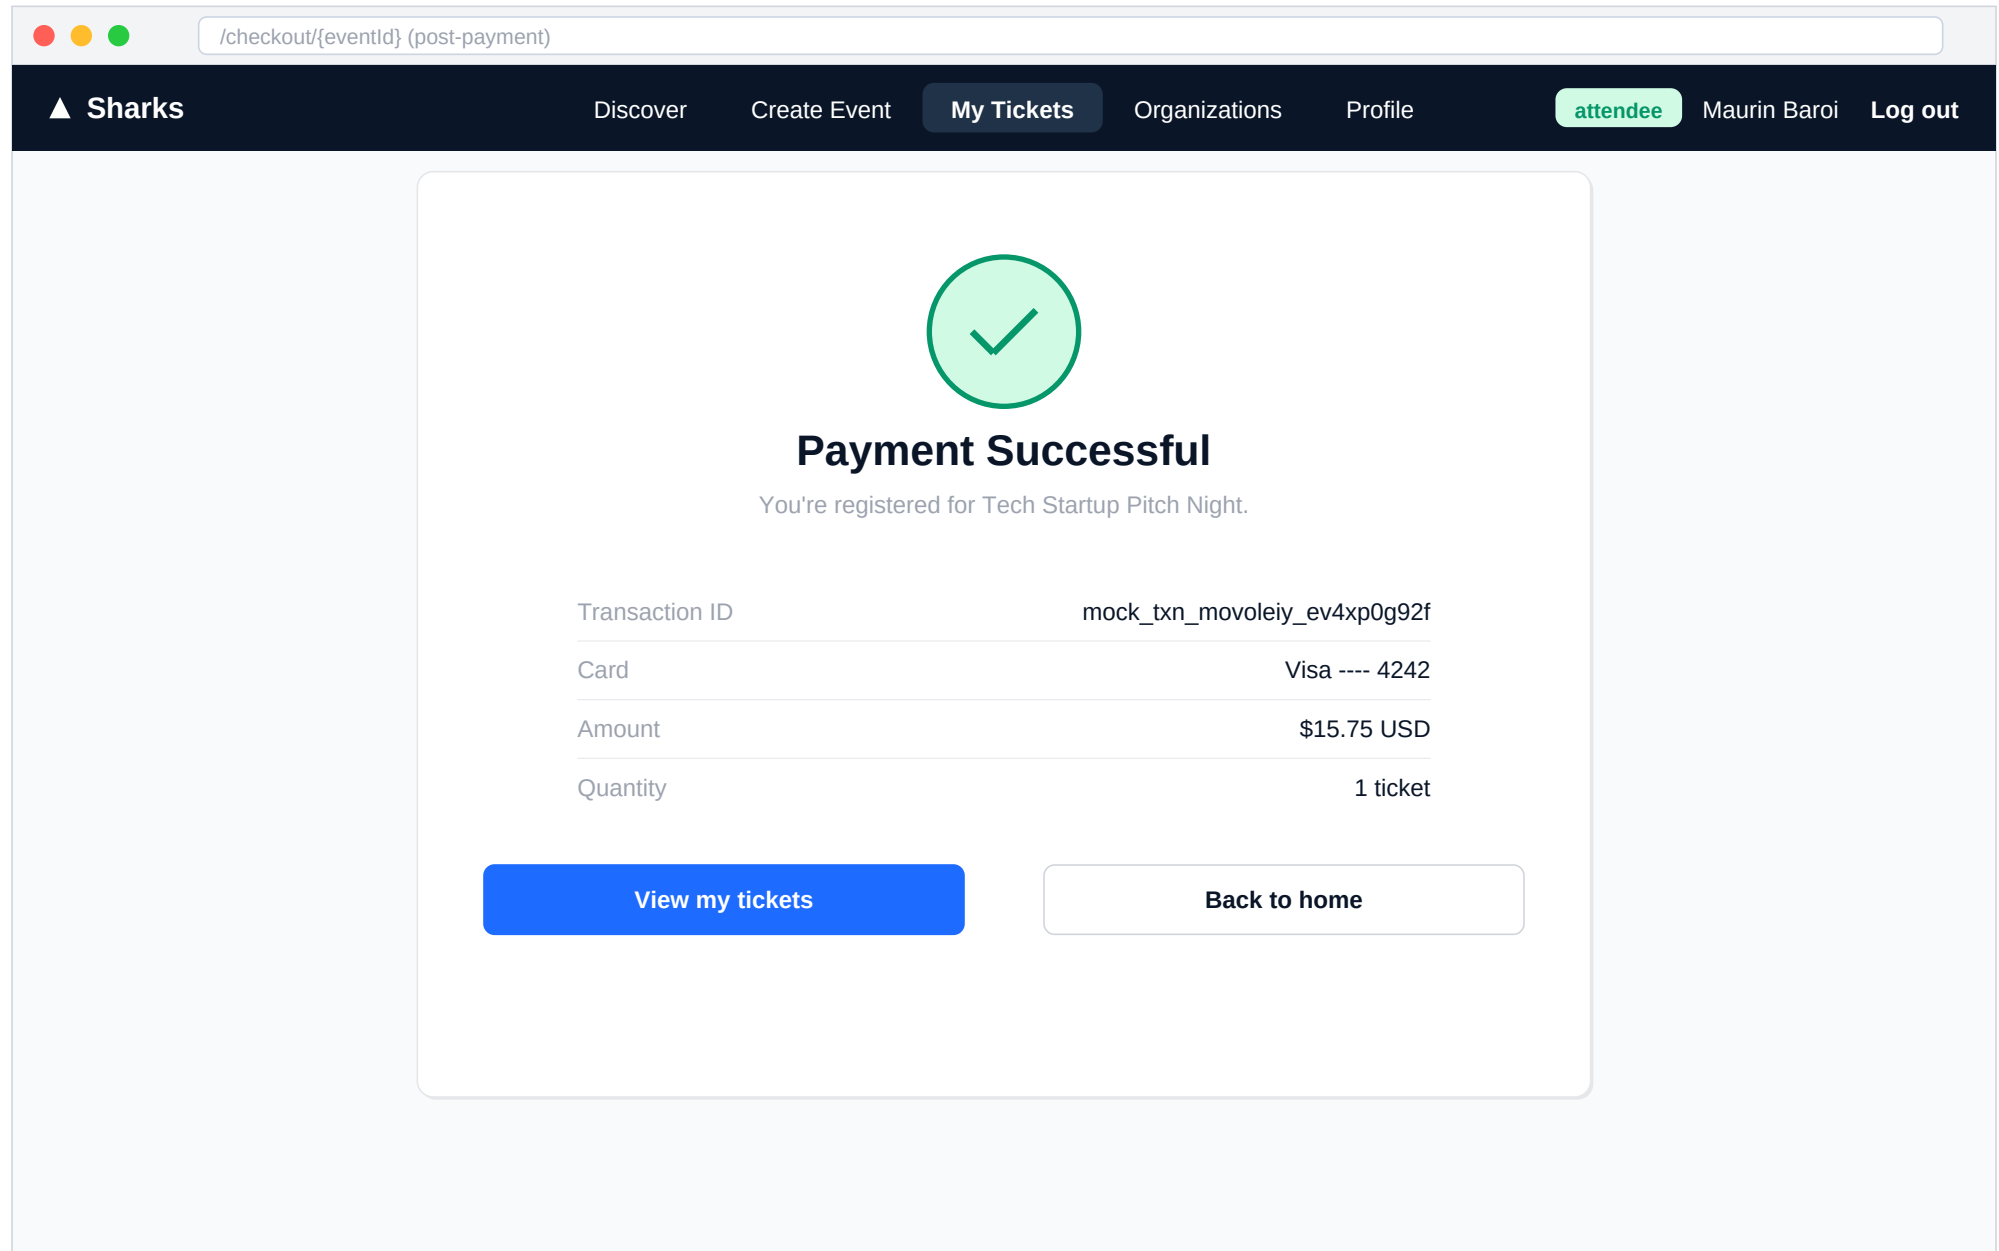

\$15.75 USD

Notes:

- POST /api/v1/tickets/purchase - emits ticket.purchase.initiated on RabbitMQ
- Payment service consumes initiated, charges (mock), publishes payment.completed/failed
- Test cards (4242 -> success, 4000 0002 -> declined, etc.) drive deterministic mock flows

Payment Successful

Role: Attendee

- Notes:**
- Reached after `payment.completed` event is consumed by event service
 - Ticket record persisted to `ticket-postgres` and surfaced under `/my-tickets`
 - Confirmation email sent via Supabase / SES (mock in dev)

My Tickets

 Innovation Hub, San Jose, CA

View Event

Refund

\$15

1 ticket

(Past tickets and refunded tickets show below - empty in this view)

Notes:

• GET /api/tickets/my-tickets - filters by JWT subject (current user)

• Refund button initiates ticket.refund.initiated -> payment.refund.completed flow

• Ticket count badge (1 tickets) reflects total returned by the API

Save Changes

DELETE /api/v1/users/me

Delete Account

Notes:

- GET / PUT / PATCH /api/v1/users/me - JWT-authenticated CRUD on user profile
- Tabs (Attending / Created / History) call dedicated endpoints lazily on click
- DELETE cascades to remove tickets and organization memberships server-side

Create Event

Notes:

- POST /api/events - backend validates with @NotBlank, @Future, @Positive constraints
- On success, event-postgres assigns auto-incrementing ID; emits event.created on RabbitMQ
- Backend supports MUSIC, NETWORKING, DATING enum types (frontend defaults others to NETWORKING)

Notes:

• GET /api/organizations - public list; auth optional (some fields hidden when unauth)

• + Create Organization opens a modal (next page) - restricted to ORGANIZER and ADMIN roles

• Each card links to /organizations/{id} for the org's full event roster

Create Organization (Modal)

Role: Organizer / Admin

Create Organization

POST /api/organizations

Name *

Organization name

Description

What does your organization do?

Website

https://...

Create

- Notes:**
- POST /api/organizations - request body: { name, description, website }
 - Auto-adds the JWT subject as the org owner; emits organization.created on RabbitMQ
 - Modal pattern keeps the user on /organizations after success - list refetches

5

Notes:

• GET /api/admin/dashboard - aggregated platform stats; admin role required

• Stats are computed server-side via SQL aggregations against event-postgres + user-orgs DB

• Revenue is mocked since payment service runs in mock mode for the demo
